

Wang Wai Yi from 5 Mark

Chairperson of the Life and Environmental Team (2020-2021)

Good afternoon, Sister Lucy, Principal, Teachers, and fellow students,

I am Wang Wai Yi from 5 Mark. I am honored to be the Chairperson of the Life and Environmental Education Team this year.

To begin with, I would like to express my sincere gratitude to everyone for supporting us all the way through, especially the teachers who have helped to organise the activities and Janice Lam, the Chairperson of the Life Education Team last year, for their invaluable contribution to the team.

The Life and Environmental Education Team aims to develop schoolmates' potential and raise their awareness of environmental protection. Every year, we organise various activities, providing different opportunities for our schoolmates to develop their life skills and gain confidence.

In addition, our team emphasises the development of a positive attitude towards life. This year, our team is going to hold organic farming activities at school and participate in the Green Carnival and the Student Environmental Protection Ambassador Scheme, through which students can develop some positive attitudes. It is our aim to start from individual students, and then extend to their family and friends, and finally make a contribution to our society.

In order to be a better leader, our prefects are also going to participate in some leadership training programs, such as the Green Prefect Programme and the Organic Ambassador Training Scheme. Through the programmes, our student leaders will have a deeper understanding of environmental issues and practise green habits in our school campus.

Moreover, our team will continue to hold the Student Award Scheme this year. Students are going to set realistic short-term and long-term goals and attain them by the best means. By fulfilling different requirements, students will achieve whole-person development in different ways.

We will invite guests to give a lecture in the Form Teacher Period and arrange a field trip for the students, so they learn how to cherish life and nature.

We look forward to fostering solidarity among our schoolmates and us. On behalf of our team, I would like to express our gratitude to our team advisors for their instructions and kind advice.

At the end of this speech, I would like to stress that the Life and Environmental Education Team strives for our school's better development, so as to bolster the students' whole-person development. We also hope to foster positive values among the students to live up to our school motto 'Love and Labour'.

Thank you!
